ABOUT

Solution and results-oriented developer. I played a key role in developing a tax platform in React.js, designing and implementing the core frontend architecture and its components. My contributions significantly improved the user experience and reduced the website's rendering time by over 60%.
Additionally, my experience in sales gives me a clear understanding of the commercial process, allowing me to create more efficient and intuitive user experiences. I am passionate about developing solutions that combine clean code, optimized performance, and exceptional usability.

EXPERIENCE

Front-end Developer | 03/2024 – Present

Open Soluções Tributárias, Brazil • Remote

- **Development of:**
  - A Tax model that connects to the Federal Bank of Brazil, allowing clients to manage their taxes.
  - Built CRUD screens with HTTP interactions using a REST API and Swagger UI.
  - Designed responsive interfaces following the Figma design specifications.
  - Improved website response speed by implementing React Context "Providers" and optimizing performance with React Hooks like useMemo() to prevent unnecessary re-renders.
  - Developed frontend logic for a model with over 140 customizable permissions, including a CRUD page for managing user roles and permissions, as well as logic to allow/block routes/actions and show/hide buttons/texts based on user permissions.
- **Techs**: JavaScript, React, Swagger, Axios, Formik, MUI Material, Styled Components, CSS, HTML, Git, GitLab, GitHub and Jira.
